Traditional Finance Operations Are Costly, Slow, and Inaccurate

Fintower automates forecasting, real-time analysis, and strategic reporting — tasks that typically occupy entire departments

	 COSTLY	 FRAGMENTED	 MANUAL
WHY IT'S A Problem	Finance employee average cost is 1.5 mSEK per year	Companies often juggle up to 18 separate data sources in their financial models	50% of finance hours wasted on manual activities with automation potential
WHAT'S THE Impact	Draining budgets	Decisions taken too late or based on inaccurate data	Capital & resource waste

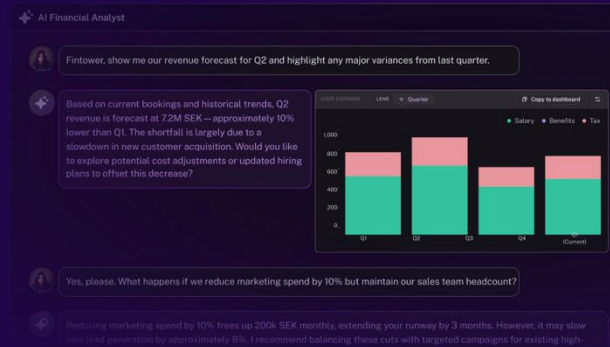

THE FIVE WAYS A CFO Drives Finance

We optimize financial processes outside accounting (plan, analyze, report, advise). Daily bookkeeping and payroll not within Fintower scope

🌟 AI Summary

Sales was down in Q4 2024, 2025
SME SaaS companies sold best

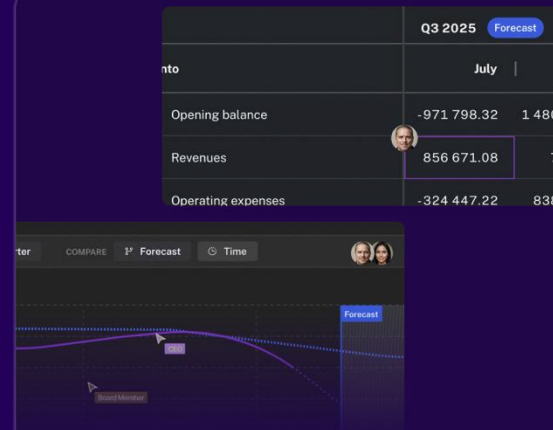

AI at Your Fingertips

Leverage cutting-edge AI to streamline your financial analysis, automate repetitive tasks, and generate real-time insights that drive informed decision-making

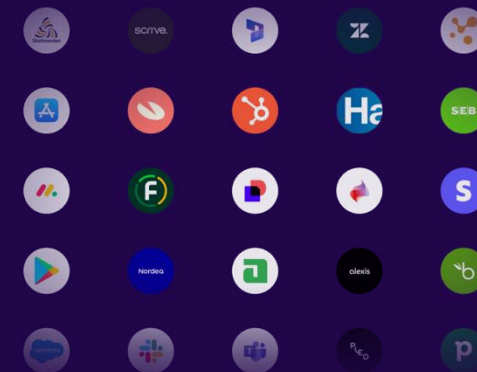

Visualizations You Understand

Transform complex data into intuitive dashboards and interactive graphs that make financial insights clear, actionable, and easy to understand

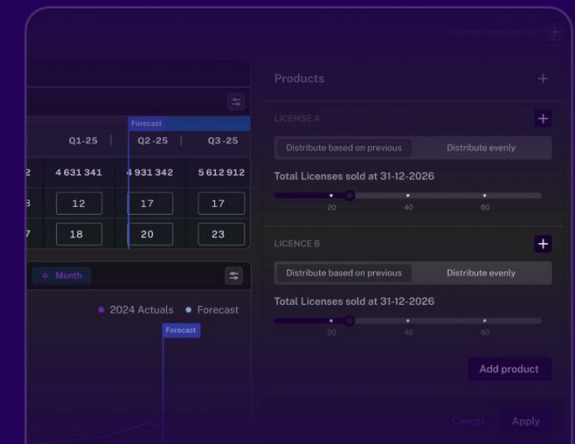

Never Miss a Report

Collaborate seamlessly, share reports effortlessly, and control access to ensure that the right insights reach the right people—when they matter most.

Add All Your Financial and Business Data

Connect all your financial systems and operational data sources for a single, unified view. Gain everything you need to make faster, better-informed financial decisions

Model Like a Pro

Create realistic financial forecasts with AI-driven scenario modeling. Explore 'what-if' scenarios and make confident decisions with precision insights

Why Now?

Businesses deserve a finance function that's agile, affordable, and always on.

Fintower's timing is perfect. With four key societal shifts colliding, we're ready to take the market by storm.

Easy, Real-Time Data

With modern APIs and cloud computing, businesses no longer slog through siloed spreadsheets. It's now possible to integrate all your financial data sources in real time.

Post-GPT: Instant Insights

In the post-GPT era, leaders expect instant insights—no more waiting for end-of-month figures. AI-driven solutions deliver continuous visibility into performance.

Cheaper, Faster, Better

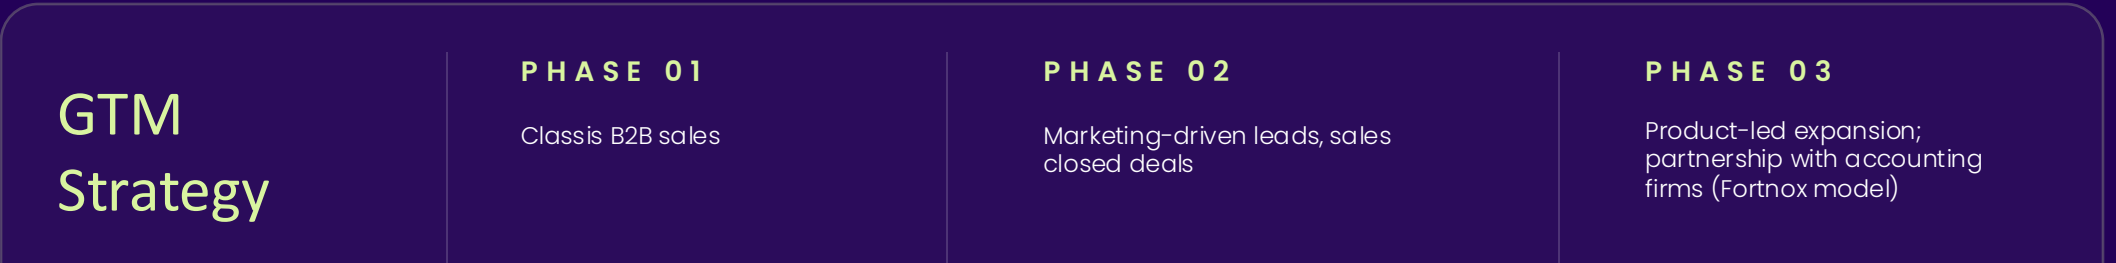

Economic volatility forces companies to do more with less. AI-powered tools slash overhead compared to traditional structures, providing lightning-fast reporting at a fraction of the cost.

Immediate ROI

Businesses can't afford months of setup. AI CFO solutions plug in quickly so you can start making data-driven decisions—and reaping the benefits immediately.

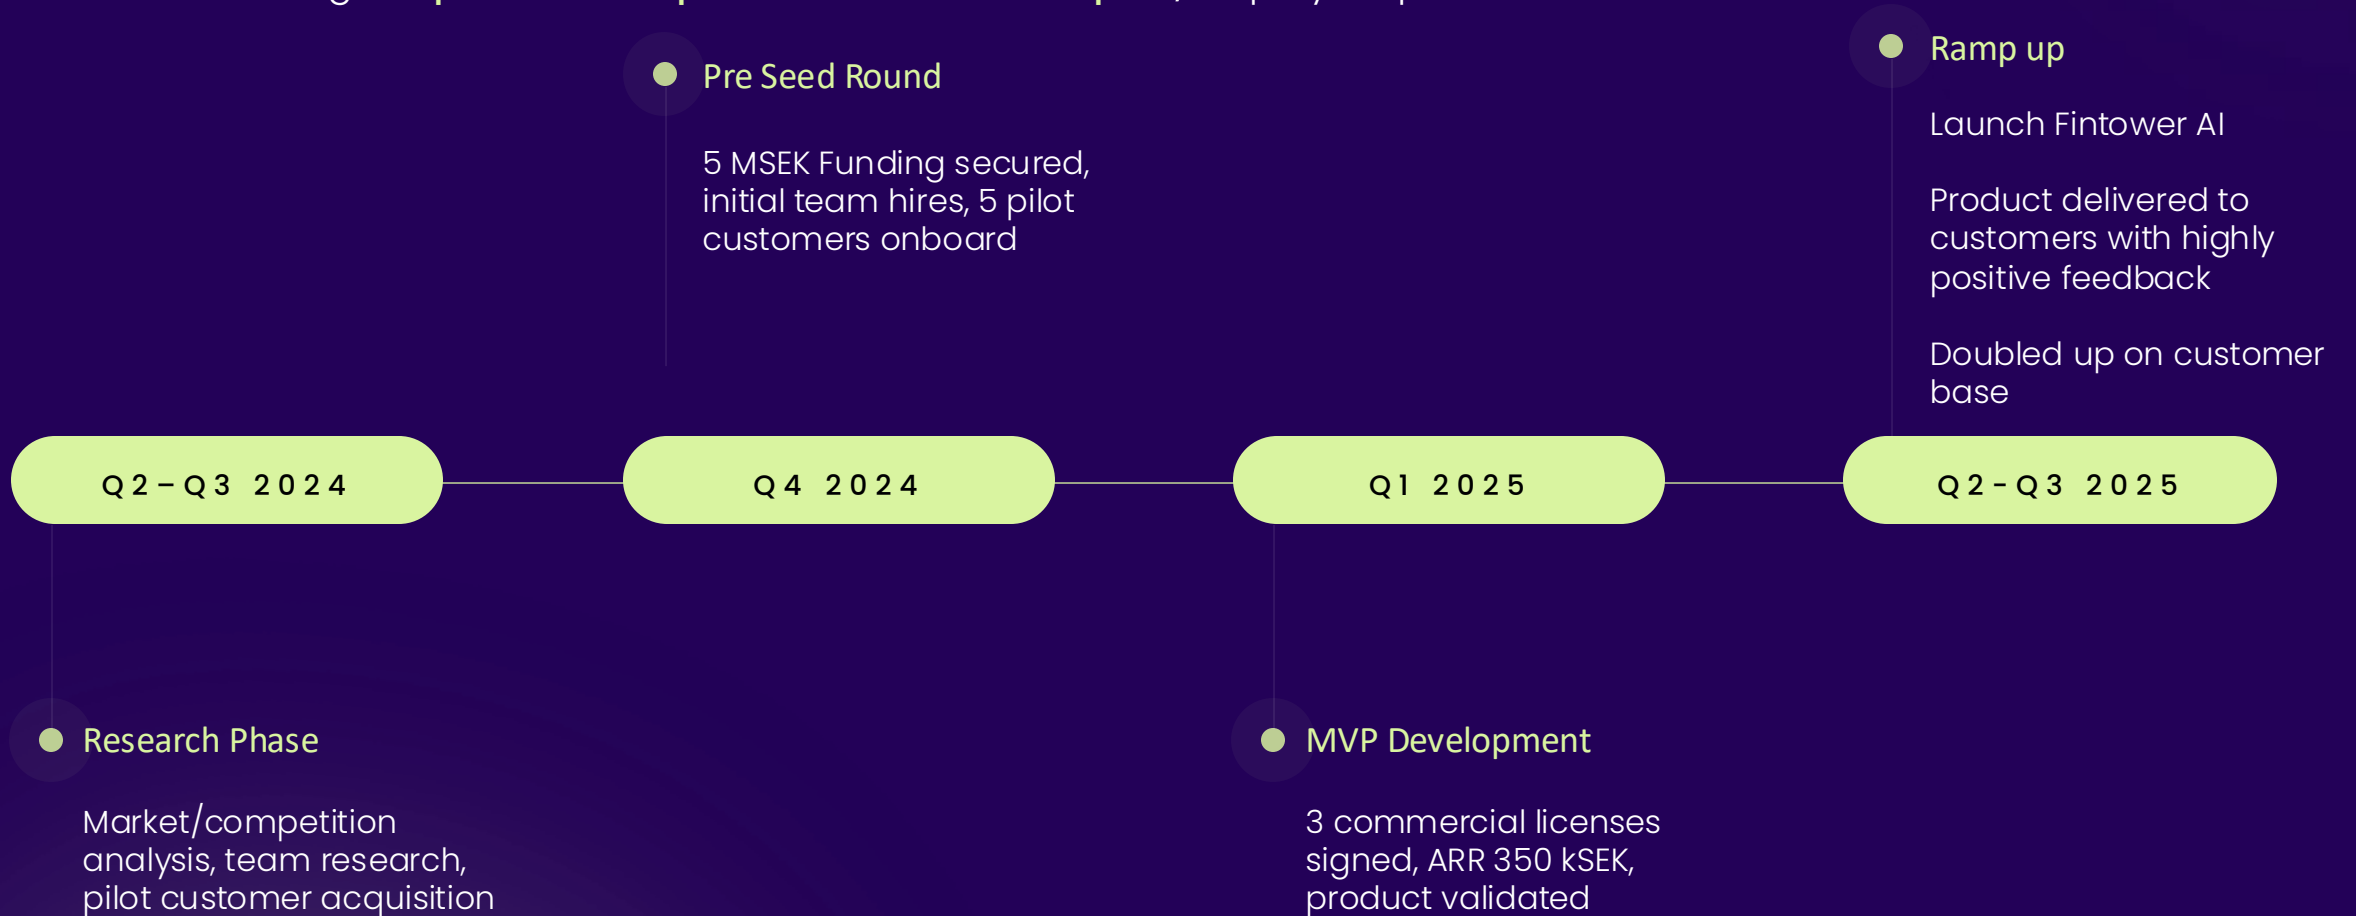

Flexible, Modular Pricing

Initially targeting customers with <100m SEK revenue and no CFO next step is to increase target to CFOs with larger finance functions

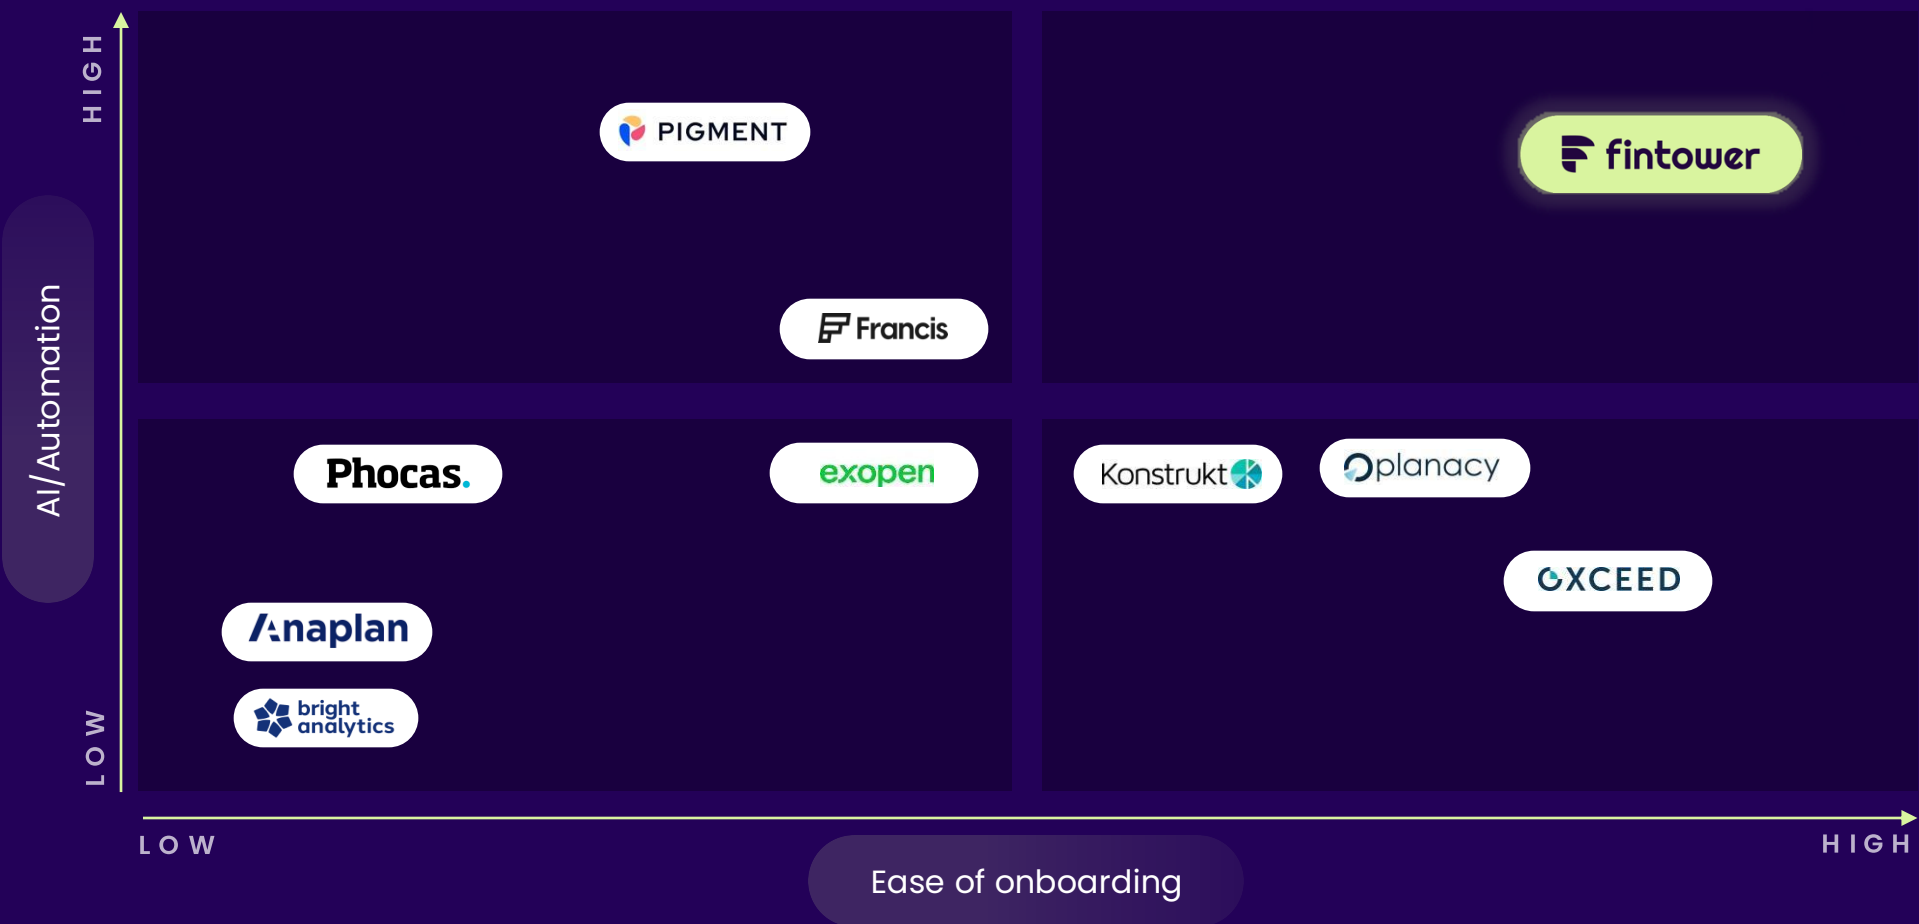

Timeline & Milestones

We're building the **preferred AI-powered financial co-pilot**, step by step:

Competition

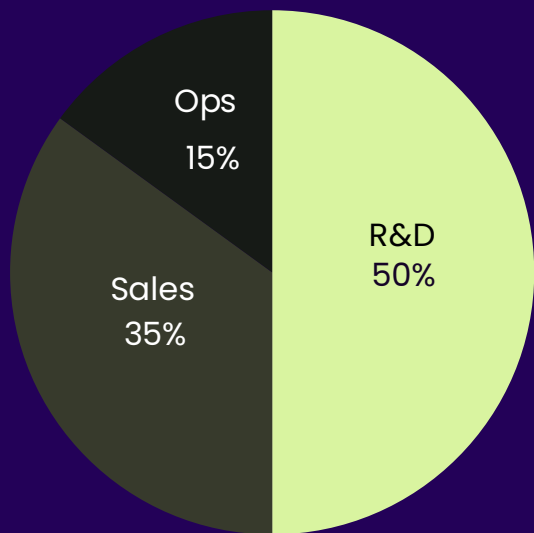

Most players only tackle one or two financial processes, and none deliver a fully intelligent SaaS solution. Here's how they compare in terms of AI/Automation and Ease of onboarding

Raising up to 15 MSEK in Q4 2025

Where 11.5 of 15 MSEK already committed by existing and new investors. Lead investor secured

Allocation %

Category	Allocation	Purpose
R&D	8 MSEK	Enhancement of AI and automation features
Sales	5 MSEK	Nail customer acquisition. Target to onboard new customers in < 1 week
Ops	2 MSEK	Other OPEX and improve infrastructure for reliable growth

Funding targets

Hit 10 MSEK ARR

Validate unit economics

Proven & repeatable GTM
