

# winteria

Removing the human factor

A dark, semi-transparent background image of an industrial factory floor. Several yellow robotic arms are visible, working on assembly lines. The scene is dimly lit, with the robots providing the primary light source in the frame.

# 26,3

% of cost related to weld defects

A large industrial robotic arm, primarily orange and yellow, is the central focus of the image. It is positioned in a factory environment with a high ceiling and various structural elements. The arm is extended, and its joints are visible. In the background, other industrial equipment and structures are visible, though slightly out of focus. The overall scene is dimly lit, with the robotic arm being the most prominent feature.

# 10

Bilion € cost of weld defects in EU alone

# Poor weld quality inspection is a major industry pain.

Poor accuracy

Repetitive work

No data recording

Prone to human error

Slow process

# Analytics and AI, using off-the-shelf hardware.

Scanning is easy

Analytics is hard

Reduced cost

Optimized production

Accurate defect detection

Increased productivity

Reduced risk of defective  
customer deliveries

A large orange industrial robotic arm is the central focus, positioned in a complex factory environment. The background shows various industrial structures, including yellow overhead cranes and metal frameworks. The scene is dimly lit, with the robotic arm's lights providing a focal point. Overlaid on this image is the number '180 000' in a large, bold, yellow font.

# 180 000

A large industrial robotic arm, primarily orange and black, is the central focus of the image. It is positioned in a factory setting with various metal structures, pipes, and other machinery visible in the background. The scene is dimly lit, with the robotic arm's lights providing some illumination. The text "6 weeks" is overlaid in a large, bold, yellow font across the middle of the image.

# 6 weeks
